Abstract

This package provide disable ligatures for serbian languages. In serbian languages, in latin scripts, exist only **fi** and **fl** ligatures, so this package provide disable ligatures for this type of ligatures.

1 Introduction

This package is activate by typing `\usepackage{serbian-lig}` in preamble for your document, and provide disable ligature for words which contains `fi` & `fl` ligatures in serbian language in latin scripts. The list of words with ligatures you may see in document `lig-list.pdf` and same words in `serbian-lig.sty` package. If you want you may me send same words to zoran.filipovic@yahoo.com and I put in package.

2 Example

If you tupe: Kada je oficir sreo prefinjenu damu najfinijeg manira počeo je da vadi fleke.

This produce: Kada je oficir sreo prefinjenu damu najfinijeg manira počeo je da vadi fleke.

If you tupe: Kada je \oficir sreo \prefinjenu damu \najfinijeg manira počeo je da vadi \fleke.

This produce: Kada je oficir sreo prefinjenu damu najfinijeg manira počeo je da vadi fleke.

So, happy T_EXing in serbian language.
