

**NAME**

dvi2fax – convert a TeX DVI file to G3 fax format

**SYNOPSIS**

**dvi2fax** [-hi|-lo] *file* [.dvi] [*options for dvips*]

**DESCRIPTION**

**dvi2fax** uses **dvips**(1) to convert a TeX DVI file to PostScript, then **gs**(1) to convert the PostScript to G3 fax file format.

**OPTIONS**

**-hi** use high fax resolution (204x196 dpi) (default).

**-lo** use low fax resolution (204x98).

**dvips** options can follow the file name.

**EXAMPLE**

Example: dvi2fax foo -l 2

**SEE ALSO**

**dvips**(1), **gs**(1).
